

Platforms and Consistency

Or: “Why does the RHEL guy care so much about OpenShift?”

Gunnar Hellekson
VP, RHEL

Mission Statement

We are the source for safe and reliable Linux innovation that make your workloads successful.

We are everywhere you want us to be.

We serve the Red Hat portfolio and the larger Red Hat ecosystem.

RHEL 101

"I want an secure, reliable application host."

OpenShift as a Hybrid Cloud Application Platform

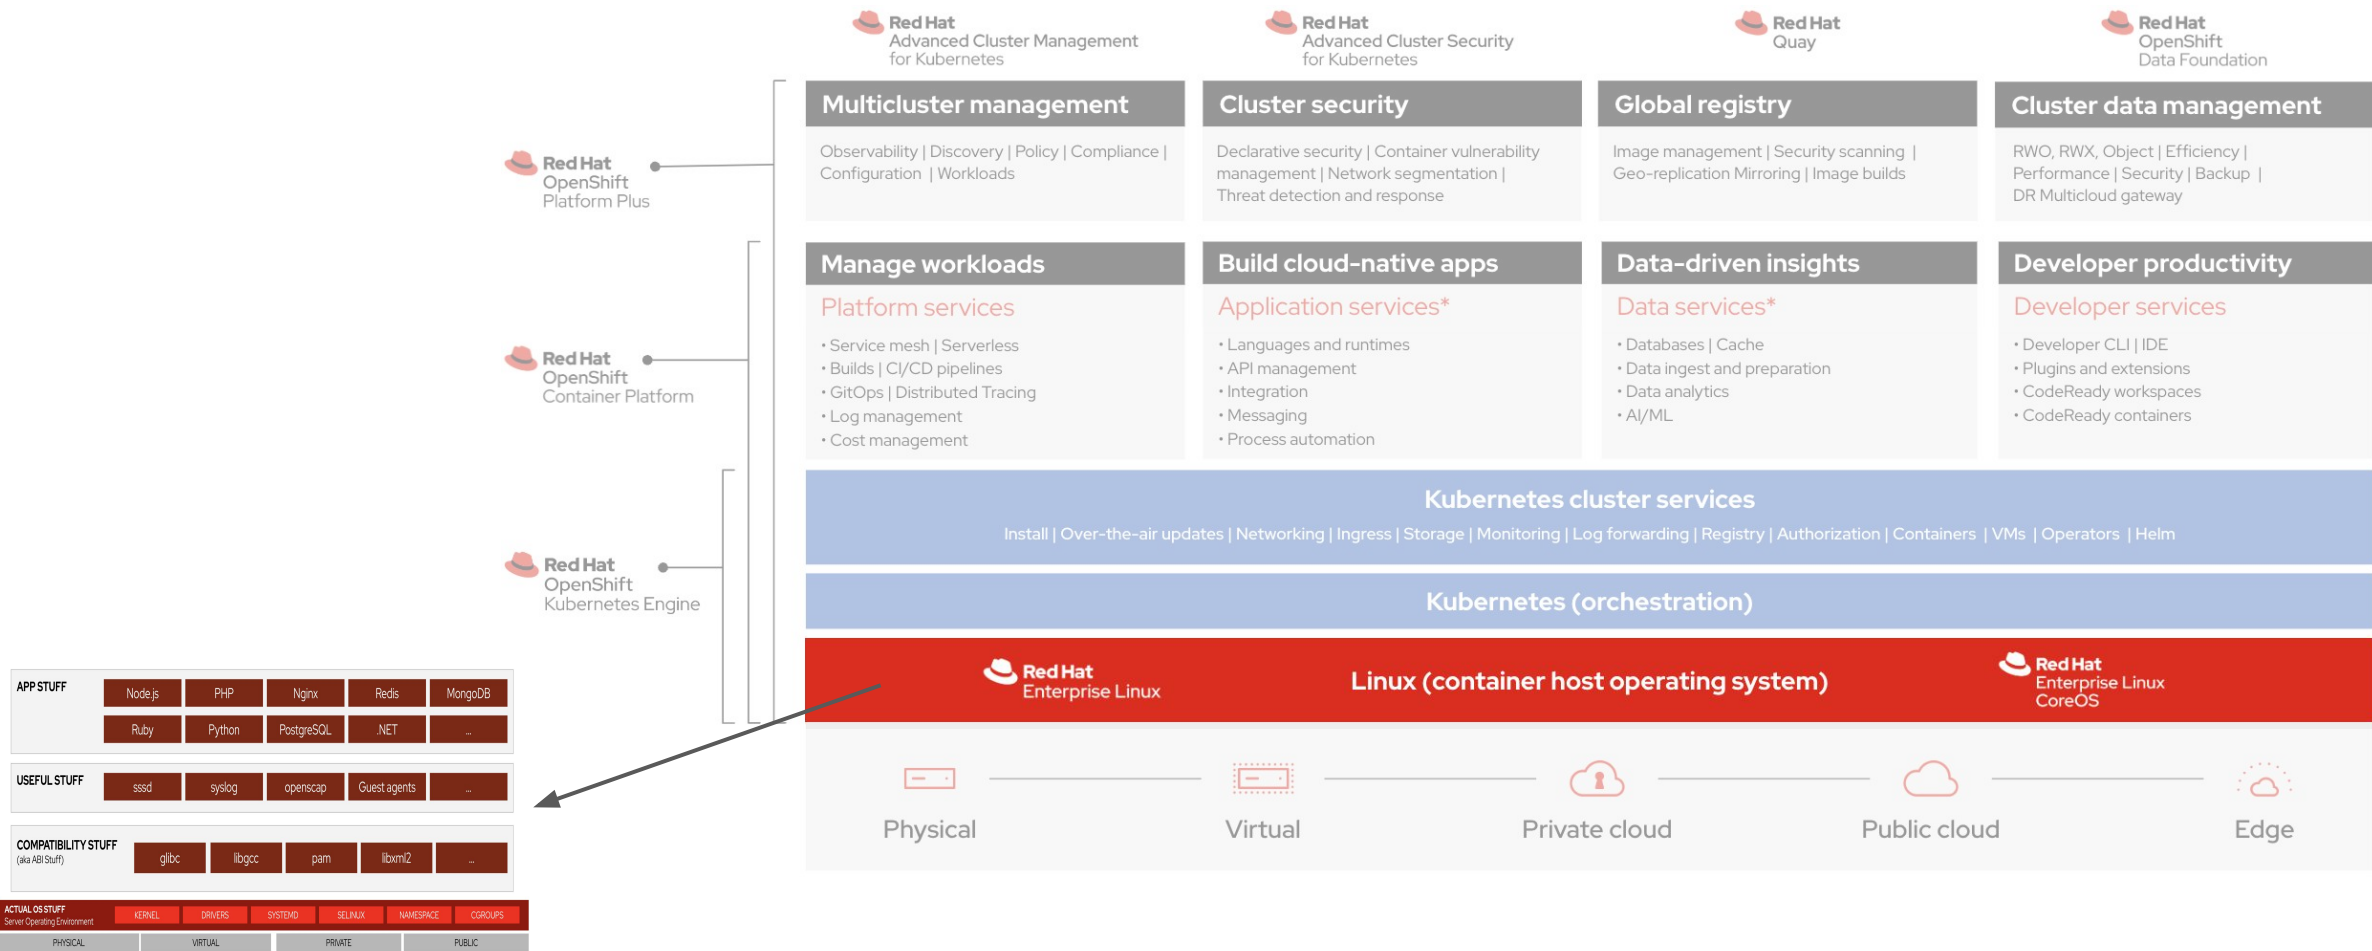

* Red Hat OpenShift® includes supported runtimes for popular languages/frameworks/databases. Additional capabilities listed are from the Red Hat Application Services and Red Hat Data Services portfolios.

** Disaster recovery, volume and multicloud encryption, key management service, and support for multiple clusters and off-cluster workloads requires OpenShift Data Foundation Advanced

Red Hat

Technical Consistency in an OpenShift Context

Platforms and Consistency

Operational consistency requires Technical consistency

DEVELOPMENT

Faster onboarding

Less guesswork

Less bikeshedding

SECURITY

Fewer variables

Risk offloaded to the platform

Better visibility

Faster remediation cycles

OPERATIONS

Commoditization of infrastructure

Better scale for talent

Easier integrations
